OUR NEXT MEETING
Thursday, April 12
7:30 pm
Friendship Auditorium
3021 Riverside Drive
Los Angeles
We meet the second Thursday of each month at 7:30 pm
It is free to SCHS members and $5 for non-members without a guest pass, which is found on the front of your member card.

WELCOME TO OUR NEW MEMBERS!
Martine Bednarski

PLANTS FOR SALE TOO!
Greenwood Daylily Gardens
and Matilija Nursery will be selling irises at the back of the hall.

NEXT SHARING SECRETS QUESTION
The Sharing Secrets question for April is:
Which irises do you grow?
You can answer on the cards we’ll supply at our April 12 meeting or e-mail your response to bushweit@yahoo.com by Friday, April 13.

Our April Opportunity Drawing plants will be different types of iris (used as visual aids during the panel discussion) and will include bearded, Pacific Coast, spuria, Louisiana irises as well as other types.

Iris Forum, with panelists
Dr. Richard Richards,
John Schoustra and Bob Sussman

April is for irises. In ancient times Iris was the messenger who brought word from the gods to the mortals (via the rainbow.) Today irises exclaim the same message every year: IT’S SPRING AND LIFE IS BEAUTIFUL! Our panel of iris experts will help us understand the bewildering range of iris types, from desert dwellers to swamp lovers, and teach us about the best irises for Southern California.

The Panel:

Dr. Richard Richards is Past President of the Society for Pacific Coast Native Iris www.pacificcoastiris.org, has authored numerous articles for the SPCNI Journal and has been breeding Pacific Coast native iris for over 40 years. He has also grown and bred tall bearded irises for over 25 years. Dr. Richards is a professor emeritus of Cal Poly Pomona, and is currently working on a book titled The Philosophy of Humor.

Bob Sussman owns and operates Matilija Nursery in Moorpark www.matilijanursery.com. Matilija specializes in California native plants with an emphasis on Pacific Coast native irises. He also grows several other classes of irises. Bob ran the seed bank for the Society for Pacific Coast native iris for many years, is currently President of SPCNI, and is currently organizing a SPCNI bus tour for this years National Iris Convention.

After earning a landscape architecture degree from UC Berkeley, SCHS board member John Schoustra spent 20 years in landscape design/build and preservation until he resolved to focus on finding and breeding new and useful plant varieties for California landscape professionals. His nursery, Greenwood Daylily Gardens www.greenwoodgarden.com grows hundreds of daylily, iris and pelargonium varieties in the Somis area of Ventura County.

As with our very successful rose panel awhile back, at least half of the program time will be dedicated to having our three experts debate and answer questions submitted by our members. John Schoustra has already received quite a few iris questions and would welcome more before the meeting. Please e-mail your questions to john@greenwoodgarden.com, making sure to include “SCHS Iris question” in the subject line.

A NOTE FROM THE MARCH MEETING...
There is no ‘P’ in Australian plant food. For those of you who took home treasures from Australian Native Plant Nursery www.australianplants.com, Jo O’Connell wants you to remember that Australian plants evolved in acidic, low phosphorus soils, so:
1. No P (phosphorus) in the plant food.
2. Mulch generously.
3. If plants look chlorotic, sprinkle soil-sulfur and/or gypsum around plants.
4. Australian Natives welcome beer on all days ending in “y”. (if you visit the nursery, she probably prefers Fosters)
March Meeting Recap

The March meeting of the Southern California Horticultural Society was a thought provoking journey through the history of garden design as it relates to the structure and symbolism of the flower, (and historical gardens, and religion and our relationship to nature, etc.). The talk by Chip Sullivan, author, landscape architect and professor of landscape architecture at UC Berkeley, ranged over the history of how we garden, what it means, and how he has changed on his own journey. This was heady stuff (and funny too! Chip has a strange sense of humor). The imagery of early interpretations of nature in relation to man and the temporal world and also the spiritual world were intriguing and probably could fill an entire lecture to be fully understood.

But we didn’t stop there. Mr. Sullivan is also an artist, and his pen and ink “cartoons” (this seems almost like a slur when labeling these amazing drawings), chronicling the history of garden design were illuminating (as much about the man as his journey through the history of landscape architecture). The drawings are meant to be read as a visual history of how we have manipulated the landscape (and why we choose to do it in the way we do).

This “Graphic Novel” approach to the evolution of design, is not the standard way of learning a complicated subject— but for the creative mind (usually favoring the visual side of the brain) it is immediately accessible. When paired with the images of medieval walled gardens and Moorish “Paradise” gardens it all gets to be quite a rich mix when compressed into one hour. If this talk inspired you to purchase books I would highly recommend Chip’s earlier book, Garden and Climate, which shows how we have dealt with water, irrigation, weather, etc. All fascinating. Thank you, Chip Sullivan for a feast of riches from the distant past, to the present.

Thanks to Jorge Ochoa and his students from the Ornamental Horticulture Nursery at Long Beach City College for bringing and describing the Opportunity Drawing plants.

Thanks to everyone who helped set up, run and clean up after, our meeting. We hope to see you in May for Lorene Edwards Forkner, incoming editor of Pacific Horticulture Magazine. Lorene will discuss her new book, Handmade Garden Projects.

- By Steven Gerischer

Sharing Secrets

In March, we posed the question, “Which plants do you grow in your garden for fragrance?” Here are the “secrets” some members shared with us:

Herbs! I love pinching them for a sniff, and it’s a bonus when trimmings go through my chopper!

- Judy Springborn

I grow several:

- Lavandula angustifolia ‘Miss Katherine’
- Lavandula ‘Goodwin Creek Grey’
- Rosmarinus officinalis ‘Primley Blue’
- Heliotropium arborescens ‘Atlantis’

And my favorite by far is the intoxicating Aloysia virgata, which I obtained as a cutting from the Huntington’s Plant Sale Nursery where I volunteer weekly. The scent from this plant – which becomes very strong on hot days – will make you swoon with pleasure!

- Dorena Knepper

SECRET CONTRIBUTORS

- Jim Jaeger

**TRACHOSTEMA LANATUM**

**SALVIA ‘AROMAS’ AND SALVIA ‘POINT SAL’**

**PITTOSPORUM UNDULATUM**

**CEANOTUS CUNEATUS (FOR FLOWERS)**

**CEANOTUS ‘DARK STAR’ AND C. ‘JULIA PHELPS’ (FOLIAGE IS SPICY)**

**RIBES MALVACEUM**

**GNAPHALIUM (EVERLASTING)**

**NASTURTIUM (TROPAEOLUM MAJUS)**

**OSMANTHUS FRAGRANS – RIGHT BY THE FRONT DOOR SO I’M GREETED WITH A LOAD OF RELAXING SCENT WHEN I COME HOME FROM A HARD DAY’S WORK!**

**ROSEMARY. HANSEEDE@PRODIGY.NET**

**LEMON VERBENA (ALOYSIA TRIphylla)**

Add your response to this question on our Facebook page discussion board.

You can renew your membership and sign up for field trips online!

Our on-line membership link is up and running on our website. You can now renew your membership, initiate a gift membership and also sign up for field trips. While you’re there, fill out your profile so other members can get to know you. It’s simple; here’s how.

Welcome to SCHS MemberLodge!

Our Membership Coordinator, Joel Lichtenwalter (with help from fellow board member, Jim Henrich, and our webmaster, Trish Meyer), worked very hard to get our membership records into an on-line database system and interactive community called MemberLodge.

SCHS MemberLodge is open to SCHS members only. Your personal information is protected and it is the Society’s policy to never sell or share our membership list. You choose what information you want to share with other members.

Once you log on, you can manage your membership online – create and update your own profile, send messages to other members and participate in forums and blogs. Our site administrators will also post upcoming events there to make it easier to sign up and pay for the event all at once.

Renewing memberships will also be easier online – reminder notices will be sent starting a month before your membership expires so that you can renew without missing any newsletters or Pacific Horticulture issues.

With MemberLodge, you can use a credit card (through PayPal) to purchase any of these on-line offers: membership renewals, special events and field trips, our annual banquet, donations and more. Of course, you can still renew with a check or cash at meetings or by mail.

We know you will like the new features. Go to schs.memberlodge.org to set up your on-line account. If you haven’t given us your e-mail address (or have a new one), please consider joining us online. It’s a great way to stay connected to the group.

Please contact Joel Lichtenwalter (310-908-5036 or e-mail joel@grououtdoordesign.com) or Laura Bauer (626-437-9495 or e-mail lbauer@elchuffy.com) if you have any questions or concerns.

- Laura Bauer

**Book Sale at March Meeting**

The sale of used books at the March meeting brought in $346 dollars. I would like to thank everyone who donated books for the sale and Bart O’Brien for bringing the books from RSABG.

Thanks as well to Elizabeth Schwartz for volunteering on the spot to run the sales table for the used books.

- Steve Gerischer
Thank you to all who brought plants to the December 2011 meeting. Everyone is encouraged to bring in plants to share with the group. Remember that you do get one free Exhibitor’s Ticket for the Opportunity Drawing if you bring in one or more plants for discussion at the Plant Forum table.

In addition to the plants discussed below, the following plants, described or listed in the Society’s Selected Plants for Southern California Gardens (2000) or previously written up for a Green Sheet, were shown. [Family names in accordance with the Angiosperm Phylogeny Group II (http://www.mobot.org/mobot/research/apweb/) are included for your reference.]

Callisia warszewicziana [Tripogandra] (Commelinaceae), exhibited by Jim Jaeger, grown at Huntington Botanical Gardens, Pasadena.

Pedilanthus bracteatus, slipper plant (Euphorbiaceae), exhibited by Kathy Itomura, grown in Burbank.

Pycnostachys urticifolia, hedge-hog sage (Lamiaceae), exhibited by Ann and Eric Brooks, grown in the Baldwin Hills.

Information in this compilation was gleaned and condensed from the Plant Forum exhibit cards, numerous sources in our library and a suite of internet sites.

Aeschynanthus speciosus, lipstick vine, basket vine (Gesneriaceae), exhibited by Eric Brooks, grown in Baldwin Hills.

This species is native to south-east Asia and has stunning orange flowers up to four inches long. It is a trailing epiphyte that flowers from late summer into the fall. Care requirements are similar to those of African violets and Streptocarpus species, so you will want to water carefully. Eric notes that this species likes a porous compost and regular water. Available from The Potting Shed, Fullerton Arboretum.

Dermatobotrys saundersii, tree jockey (Scrophulariaceae), exhibited by Ann Brooks, grown in Baldwin Hills.

This stunning South African plant is one of very few species to still be classified in the figwort family. This is a new plant for 2011 from San Marcos Growers who describe it as an unusual epiphytic semi-deciduous subshrub, reaching up to 3 feet in height and diameter. Ann notes that it likes a well-draining soil and bright shade. Available from South Coast Botanic Garden.

Send notices to lili.singer@sbcglobal.net
On a beautiful Sunday morning in late February, we gathered about 40 society members at Nuccio’s Nursery in Altadena. It was a good time to visit the nursery, as most of the camellia and azalea varieties were in full bloom. Tom Nuccio showed us around the nursery and revealed some of the mysteries of growing camellias.

To propagate camellias from seeds, you need a lot of patience. The seeds may take 12 months to germinate, and then an additional 6 or 7 years for the plant to bloom. Therefore, unless they are breeding new varieties, Nuccio’s grows most of their camellias from cuttings and grafting. Tom demonstrated how to graft a scion onto a rootstock and made it look easy! One lucky tour attendee got to take home a newly grafted ‘High Fragrance’ (and yes, the light pink flowers are highly fragrant!).

Tom also brought out some rare and unusual camellias. *Camellia azalea* and *Camellia amplexicaulis* are both Asian species with very large leaves and late summer bloom times. They contain the possibility of producing “everblooming” camellias. A third species, *Camellia edithae* has large leaves and scaly brown buds that open to reveal dark pink flowers. Tom also showed off an as-yet-unnamed cultivar with large, gorgeous flowers that are light pink, shading to white at the center.

Tom and Julius Nuccio helped people select some prime specimens to take home. Unfortunately, we didn’t have time to hear about the amazing varieties of azaleas (how about lavender, spider-flowered, or green?) or other plants that Nuccio’s sells (dogwoods, lilacs and gardenias). If you didn’t have a chance to tour with us, I would urge anyone who wants to see beautiful plants to visit there.

We next visited the private garden of Wynne Wilson. Even though it was the tail end of winter, masses of coral bells, ceanothus and bush germander (*Teucrium fruticans* ‘Azurea’) were blooming. We gathered by the beautiful custom tiled fountain and pool to hear Wynne talk about the challenges of building the garden and her plans for its future. Then we were invited to wander along the paths through the woodland and down to the hidden backyard stream. Wynne was a most gracious host, and it was a real privilege to see her garden.

We finished up our tour day with a picnic at Charles Farnsworth Park, under the (blooming) Wisteria Pavillion. Thanks to everyone who brought food to share!

- Laura Bauer

---

**TOUR OF JUDGE HALL’S GARDEN**

The garden of the late Judge Cynthia Hall was opened to our society by special arrangement for a final look. The property is for sale and is not likely to be opened to the public again. Designed by Chris Rosmini and tended by John MacGregor, this spectacular garden began when a small section near the front entryway was redesigned by Rosmini to “see if it would work.” Not long after that section was completed, she was asked to design the rest of the garden. The progression of flower and foliage color throughout the garden is remarkable. On the day we visited, the wisteria over the back entry to the pool area was in full bloom, adding perfume to all of the other early spring flowers. The recent wind storm that slammed the San Gabriel Valley did not spare this garden, but one could hardly tell. The riot of color and the sheer number of different plants distracts from any lingering damage. (I walked right by the headless Jacaranda and did not notice until John pointed it out.)

The approach to the house, along a long driveway is bordered by a remarkable swath of garden intermingling traditional design elements and plant material with the very unusual. The South African bulbs (corms) were particularly colorful, babiana and sparaxis taking center stage. At the back of the house is a pool surrounded by more spectacular borders. Even the diving board for the pool seems to float over the rosemary and other plants surrounding its supports.

We would like to thank Chris Rosmini and John MacGregor for talking to us about the design, construction and upkeep for this wonderful garden--and for the last-minute arrangements to allow this special treat. A big thanks to Joel Lichtenwalter, our tour/field trip chair on the SCHS board for bringing this together (as well as Laura Bauer for help with the Altadena tour). If you did not get a chance to come, visit the Memberlodge section of the SCHS website to see more photos.

- Steven Gerischer
UPCOMING SCHS PROGRAMS

April 12 – Iris Forum, with panelists Dr. Richard Richards, John Schoustra and Bob Sussman. Opportunity Drawing plants and plants for sale will be primarily irises.

May 10 – Lorene Edwards Forkner will be our featured speaker with her new book, Handmade Garden Projects.

June 14 – Chris Rosmini will discuss garden design.

July 12 – Sam Watters.

August 9 – Matthew Levesque will discuss The Revolutionary Yardscape. Book sale and signing.

September 13 – Annual Award Banquet honoring the 2012 Horticulturist of the Year at the Huntington Botanical Gardens.

October 11 – Scott Kleinrock will tell us about The Huntington Ranch Project at the Huntington Botanical Gardens.

December 13 – Annual Members’ Night (aka, Cookie Night).
